Live test manual

Part B activities on PARAKH - one student per stage

This manual is for the person running the test at the screen. Follow it step by step for each stage. Each step that writes to PARAKH happens only after you type **save** in the chat. Tick each box as you go and write down what you saw: the sheet is the record of the test.

What the test proves

- The app can save a card without changing anything it should not (a **no-op save**).
- A teacher's **edited** bank activity reaches PARAKH as a **Manual** activity (PARAKH: "Create Manually"), not as a Global one.
- A teacher's **own new** activity reaches PARAKH as a Manual activity.
- When the teacher **removes their version**, the card goes back to the **bank** activity ("Pick from Activity Bank").
- The card can be **restored** exactly to how it was before the test.

Stages and students

Stage	Teacher account	Student	Status before test
Preparatory	Your connected teacher account (22 students)	Suggested: 142411 (its read-only check already showed 0 differences). Confirm in chat.	
Middle	Your connected teacher account (35 students)	You name one (a COMPLETED student is best).	
Foundational	Needs a teacher account with a Foundational class - your connected account has none.	You name one, if a Foundational account is used.	

The tool for every step is ready
All steps use scripts/phase3b_write.py (noop-a1, part-b-plan, part-b, restore-plan, restore), tested on fake data on 26 Oct 2026. Each writing step sends exactly one request (the restore: one per part), takes a snapshot first and checks PARAKH afterwards. Before each Part B step Claude first shows part-b-plan, which sends nothing.

1. Rules for the whole test

- **Nothing is written without your word.** Each writing step waits until you type **save** (step 5, the restore, waits for **restore**).
- **One step at a time.** Do the PARAKH check and fill in the sheet before the next step.
- **Do not edit this student's card on the PARAKH website** during the test. Looking is fine; pressing Save or Submit there is not.
- **Do not change the Activities tab or Bulk Entry for this student** except where a step tells you to.
- **Captcha:** you type it yourself in the web app. At most 3 attempts; after 3 failures, wait 15 minutes.
- **Speed:** the app sends at most 1.5 requests per second. **Logs show IDs only**, never names.
- **Stop** at once if any result differs from "What you should see". Claude then shows the restore plan; nothing is restored until you approve.

2. Before you start (once)

	Check	Done
a	A fresh database backup was made today (the scheduled backup ran, or ask Claude to run scripts/backup_db.py).	
b	The app is running (backend and web app) and you can log in as the teacher.	
c	In the web app, start the PARAKH session and type the captcha. The header shows it connected.	
d	You know the student IDs for each stage (see the table on page 1).	
e	PARAKH's own website is open in another browser tab, logged in as the same teacher, only for looking.	

3. How every step goes

	Who	What happens
1	Claude	Explains the step and shows exactly which request(s) will be sent (part, student ID, current part).
2	You	Prepare anything the step asks for in the web app, then type **save** in the chat.
3	Claude	Sends only those request(s). Shows the HTTP status, a summary with IDs only, then reads the card back and compares it with what was expected.
4	You	Check the card on the PARAKH website (section 4) and fill in the row on the stage sheet.
5	Both	If everything matches: next step. If anything differs: stop; Claude shows the restore plan.

4. Checking an activity on the PARAKH website

Open the student's card, go to **Part - B**, and open the activity the step changed. PARAKH treats an activity as **from the Activity Bank** when it is linked to a bank activity, and as **Manual** ("Create Manually") when it is not.

Look at	Bank activity	Manual activity
The texts (activity, assessment question, level descriptions)	PARAKH's original texts	The texts from the Activity Library (your version, or your own activity)
Bank link (checked by Claude in the card data PARAKH returns)	Has a bank activity number	No bank activity number
Subjects and Awareness / Sensitivity / Creativity levels	As set on the Activities tab	As set on the Activities tab
The student's own answers	Unchanged	Unchanged

The website does not show the bank link for a finished activity: its bank button (building icon) is greyed out with "activity already finished" in both cases. So the Manual / bank result is checked by Claude in the card data PARAKH returns; on the website you check the texts, subjects, levels and answers.

If the website shows something you did not expect, do not change it there. Write it down and tell Claude.

5. If something goes wrong

- Type **stop**. Claude sends nothing more.
- Claude shows the **restore plan**: the card's parts from the snapshot taken in step 0, re-sent in part order, ending at the same current part.
- Read it. Type **restore** only if you agree. Claude then compares the card with the snapshot; it must show 0 differences.
- Write what happened in the Notes column of the step.

Stage sheet: Preparatory

Student ID		Date	
Status before test		Current part before	
Teacher account		Run by	

What is different on this stage

- 7 subjects (Language 1, Language 2, Mathematics, The World Around Us, Art Education, Physical Education, Other Learning Activities).
- The student's own answers in Part B are the 8 self-assessment questions (Yes / No / Not sure). They come from the dashboard and must be filled, or the save is refused.
- The teacher's feedback numbers follow the chosen levels automatically.
- Suggested student 142411: it already passed the read-only check on 26 Oct 2026 (0 differences in all 6 parts).

Steps

Step	What you do	What you should see	OK	Notes
0 Read-only check	Tell Claude the student ID. Nothing to do on PARAKH.	Claude: snapshot saved; round-trip dry run shows **0 differences** in every part. Nothing sent.		
1 No-op save of A1	Type **save**.	Exactly 1 request (Part A1, identical values, current part mc). HTTP success. Read-back: status as before, current part **mc**, **0 differences** with the snapshot. PARAKH website: A1 unchanged.		
2 Edited bank activity	Activity Library: open the bank activity this student already has (Claude tells you which) and add " (test)" at the end of **How it is assessed**. Save. Do not change the Activities tab. Then type **save**.	Part B request(s) only. Read-back: that activity is now **Manual** with your edited text; same subjects, levels and student answers; other parts unchanged; **no bank number**. PARAKH website: your edited assessment text.		
3 Your own activity	Activity Library: **Add your own activity** named "LIVE TEST Preparatory". Fill every part: how it is done, how it is assessed, all 9 level descriptions, a curricular goal and a competency picked from the lists. Activities tab: choose it for **one** subject of this student (Claude suggests which) with the same three levels as before. Then type **save**.	Part B request(s) only. Read-back: a **Manual** activity named "LIVE TEST Preparatory" on the one subject you chose, **no bank number**; all other subjects keep their activities and levels. PARAKH website: it shows with your texts.		
4 Remove your version	Activity Library: open the activity from step 2 and press **Remove my version**. Activities tab: the student shows "Update: ...". Type **save**.	Part B request(s) only. Read-back: the activity is **from the bank** again with PARAKH's original texts; its **bank number is back**; same activity number on the card. PARAKH website: the original assessment text (no " (test)").		
5 Restore	Read Claude's restore plan. Type **restore**.	The card is put back exactly as in step 0: read-back shows **0 differences** with the step-0 snapshot; status and current part as before the test.		

Step	What you do	What you should see	OK	Notes
6 Tidy up	Activity Library: delete "LIVE TEST Preparatory". Activities tab: choose the student's original activity again for the subject from step 3 (Claude will tell you which).	The Activities tab shows the student as on PARAKH (no "Update" note). Nothing sent.		

Extra checks on this stage

- After step 2: the other subjects of an activity shared across subjects keep exactly the same levels.
- After step 5: Part B on the PARAKH website looks exactly as before the test.

Result

Stage passed	Yes / No	Signed	

Stage sheet: Middle

Student ID		Date	
Status before test		Current part before	
Teacher account		Run by	

What is different on this stage

- 11 subjects, including Skill Education and Bagless Days.
- A new activity needs an **Approach** (Art-Integrated, Sports-Integrated, Toy-Based, Technology-Integrated or Any other; Any other needs a short text). The editor asks for it.
- The student's own answers in Part B (self reflection, progress grid, strengths, barriers and the like) come from the dashboard.
- The teacher's feedback numbers follow the levels on PARAKH's reversed scale (Beginner = 3, Advanced = 1); the app does this.
- Known PARAKH quirk, not part of this test: the credit table row for Skill Education always shows 0.

Steps

Step	What you do	What you should see	OK	Notes
0 Read-only check	Tell Claude the student ID. Nothing to do on PARAKH.	Claude: snapshot saved; round-trip dry run shows **0 differences** in every part. Nothing sent.		
1 No-op save of A1	Type **save**.	Exactly 1 request (Part A1, identical values, current part mc). HTTP success. Read-back: status as before, current part **mc**, **0 differences** with the snapshot. PARAKH website: A1 unchanged.		
2 Edited bank activity	Activity Library: open the bank activity this student already has (Claude tells you which) and add " (test)" at the end of **How it is assessed**. Save. Do not change the Activities tab. Then type **save**.	Part B request(s) only. Read-back: that activity is now **Manual** with your edited text; same subjects, levels and student answers; other parts unchanged; **no bank number**. PARAKH website: your edited assessment text.		
3 Your own activity	Activity Library: **Add your own activity** named "LIVE TEST Middle". Fill every part, including the **Approach** (choose Art-Integrated). Activities tab: choose it for **one** subject of this student (Claude suggests which) with the same three levels as before. Then type **save**.	Part B request(s) only. Read-back: a **Manual** activity named "LIVE TEST Middle" on the one subject you chose, **no bank number**; all other subjects keep their activities and levels. PARAKH website: it shows with your texts.		
4 Remove your version	Activity Library: open the activity from step 2 and press **Remove my version**. Activities tab: the student shows "Update: ...". Type **save**.	Part B request(s) only. Read-back: the activity is **from the bank** again with PARAKH's original texts; its **bank number is back**; same activity number on the card. PARAKH website: the original assessment text (no " (test)").		
5 Restore	Read Claude's restore plan. Type **restore**.	The card is put back exactly as in step 0: read-back shows **0 differences** with the step-0 snapshot; status and current part as before the test.		

Step	What you do	What you should see	OK	Notes
6 Tidy up	Activity Library: delete "LIVE TEST Middle". Activities tab: choose the student's original activity again for the subject from step 3 (Claude will tell you which).	The Activities tab shows the student as on PARAKH (no "Update" note). Nothing sent.		

Extra checks on this stage

- After step 3: on PARAKH the activity shows the approach you chose.
- After step 4: the approach shown is the bank activity's own again.

Result

Stage passed	Yes / No	Signed	

Stage sheet: Foundational

Student ID		Date	
Status before test		Current part before	
Teacher account		Run by	

What is different on this stage

- Runs only with a teacher account that has a Foundational class; your connected account has 0 Foundational students.
- 6 development areas instead of subjects (Physical, Socio-emotional and Ethical, Cognitive, Language and Literacy, Aesthetic and Cultural, Positive Learning Habits).
- The student's own answers in Part B are the self- and peer-assessment, resources and placement (A / S / C); they come from the dashboard and Bulk Entry.
- Part C levels are listed Advanced / Proficient / Beginner on this stage (the app handles the order).

Steps

Step	What you do	What you should see	OK	Notes
0 Read-only check	Tell Claude the student ID. Nothing to do on PARAKH.	Claude: snapshot saved; round-trip dry run shows **0 differences** in every part. Nothing sent.		
1 No-op save of A1	Type **save**.	Exactly 1 request (Part A1, identical values, current part mc). HTTP success. Read-back: status as before, current part **mc**, **0 differences** with the snapshot. PARAKH website: A1 unchanged.		
2 Edited bank activity	Activity Library: open the bank activity this student already has (Claude tells you which) and add " (test)" at the end of **How it is assessed**. Save. Do not change the Activities tab. Then type **save**.	Part B request(s) only. Read-back: that activity is now **Manual** with your edited text; same subjects, levels and student answers; other parts unchanged; **no bank number**. PARAKH website: your edited assessment text.		
3 Your own activity	Activity Library: **Add your own activity** named "LIVE TEST Foundational". Fill every part. Activities tab: choose it for **one** development area of this student (Claude suggests which) with the same three levels as before. Then type **save**.	Part B request(s) only. Read-back: a **Manual** activity named "LIVE TEST Foundational" on the one subject you chose, **no bank number**; all other subjects keep their activities and levels. PARAKH website: it shows with your texts.		
4 Remove your version	Activity Library: open the activity from step 2 and press **Remove my version**. Activities tab: the student shows "Update: ...". Type **save**.	Part B request(s) only. Read-back: the activity is **from the bank** again with PARAKH's original texts; its **bank number is back**; same activity number on the card. PARAKH website: the original assessment text (no " (test)").		
5 Restore	Read Claude's restore plan. Type **restore**.	The card is put back exactly as in step 0: read-back shows **0 differences** with the step-0 snapshot; status and current part as before the test.		
6 Tidy up	Activity Library: delete "LIVE TEST Foundational". Activities tab: choose the student's original activity again for the subject from step 3 (Claude will tell you which).	The Activities tab shows the student as on PARAKH (no "Update" note). Nothing sent.		

Extra checks on this stage

- After step 2: self- and peer-assessment answers on PARAKH are unchanged.

Result

Stage passed	Yes / No	Signed	

Sign-off

When every stage you ran has passed, teachers can start using edited and own activities. Until then, keep them to the Activities tab without saving to PARAKH.
